The Marcliffe Hotel, Pitfodels, Aberdeen AB15 9YA

Annulus wellhead interventions made easy (and other new cool stuff!)

Presented by: Alan Brodie, PTC

This talk will explain PTC's lightweight, compact (telescopic) lubricator system and toolkit for wellhead VR plug / valve operations and VR profile repair. This system makes annulus line wellhead interventions significantly easier and therefore safer than before.

'Other new cool new stuff' presented will include:

- A compact lubricator and plug system used during xmas tree maintenance operations, and
- A wellhead check valve system (for SCSV control line) which replaces a hold-down lock-bolt in the wellhead (for cases where the SCSSV is allowing hydrocarbons to pass into the control line).

**Cost (including lunch & vat at 20%):
Members £20 Non-members £25 Academic/Students £10**
